

## Potential Sites for FSOC Field Trip

**Viento State Park-** Large culvert underneath I-84. The culvert is slightly undersized and utilizes baffles to provide passage and retain bedload. Highlights the difficult and sometimes high cost of fish passage on small streams.

**Condit Dam (former site)-** The remains of the dam should be completely gone by the time our visit comes around. Will not be able to see any infrastructure but will be able to see the former lake bed and the fluvial processes associated with this project.

**Lamprey Lab (Matt Mesa)-** Lamprey fish passage and locomotion.

**East Fork Hood Irrigation District-** Coanda screens are an interesting topic. There is an ongoing fish passage issue at this location (large push-up dam). A fish passage project is in the works to resolve this issue.

**Middle Fork Hood Irrigation District (Coe Branch)-** Farmers Screen, difficult fish passage conditions.

**Moving Falls-** Fish Passage Project will be under construction. Large vertical slot ladder. Also will be pump screen out of the water for folks to look at.

**Laurance Lake-** Large dam on small stream. Stream contains bull trout spawning habitat upstream of reservoir. Passage project/passage study in the works. Multi million-dollar effort.

## Potential Schedule

**-8:00am – Split into two groups and board vans at Hotel in Hood River.**

### Van 1

**~8:15-8:35am-** Viento State Park Culvert

**~9:05-10:05am-** Condit Dam Removal Site, White salmon River

**~10:25-11:25am-** Lamprey Lab

**~12:00-1:00pm-** Working Lunch at Laurance Lake. Eat Lunch, Discuss fish passage issues at the site.

**~1:00-1:45pm-** MFID Farmers Screen on Coe Branch.

**~2:15-3:00pm-** EFID Coanda Screens and Fish Passage Issues

**~3:30-4:30-** Moving Falls Fishway Construction Site

**5:00pm-** Arrive back at hotel in Hood River

**Van 2**

**~8:30-9:30am-** Moving Falls Fishway Construction Site

**~10:00-10:45am-** EFID Coanda Screen and Fish Passage Site

**~11:10-11:55am-** MFID Farmers Screen on Coe Branch

**~12:00-1:00pm-** Working Lunch, Laurance Lake Dam Fish Passage Issues

**~1:30- 1:50pm** – Viento State Park Culvert

**~2:20-3:20pm-** Condit Dam Removal Site, White Salmon River

**~3:45-4:45pm-** Lamprey Lab, Matt Mesa

**5:00pm** – Arrive at Hotel in Hood river
